JUNIPER SUPPORT RESPONSIBILITIES AND EXCEPTIONS

With this EOS extension initiative, Juniper will use its commercially reasonable efforts to provide JTAC and RMA (Return Material Authorization) support to the contracted customers up until the extended EOS dates as stated above. Juniper reserves the right to further amend the above extended EOS dates and customer contract duration if its support capability, including but not limited to depletion of inventory of relevant hardware, changes over time.

Service Level

The EOS extension applies to all current available Juniper Care support service levels, except for NDCE (Juniper Care Next Day Onsite), SD (Juniper Care Same Day) and SDCE (Juniper Care Same Day Onsite). However, on some selected products, only Juniper Care Core/SUP service level will be extended. And some RMA associated service levels are only available to customer sites located in certain countries. Please refer to the RMA support portion below and the attached *List of Product SKUs and Service SKUs under 2022 Extended EOS* for more details.

JTAC support

In the event that the software release version is already EOS, JTAC support will generally be limited to investigation and troubleshooting in an attempt to provide solutions, configuration guidelines and workarounds.

If a solution cannot be provided, customers will be expected to upgrade to a replacement product, should one be available.

Root cause analysis and hardware engineering support are not included; software engineering support including software updates and SIRT are not included; problems relating to incompatibility of newer/next generation products or problems with software that is not the supported software version stated above in this TSB are excluded.

RMA support

In the event that the FRU (Field-Replaceable Unit) and the chassis in which it is designed for use are each subject to separate EOS dates, then the earlier of the EOS date will take precedence with respect to the FRU.

In the event that Juniper has exhausted the spare inventory to support the RMA at any given time, Juniper will downgrade the support to JTAC only support.

Notwithstanding anything stated herein to the contrary, the RMA support extension does NOT apply to the following countries, where import of refurbished unit is restricted (New Buy Only Country).

Moreover, the ND (Next Day Delivery) and NDS (Next Day Ship) service are only extended to the United States and EU locations (see below EU Country List). For all other countries, the extended Juniper Care support will be capped at RTF (Return to Factory) /Core Plus (with Return-to-Factory RMA support), AR5 (Advanced Replacement 5 Day Ship), Core/SUP (with no RMA support) service levels.
